IN THE CLAIMS:

Please cancel Claim 5. Please amend Claims 1 and 16 and add new Claims

21-24 as follows:

1. (currently amended) A holder comprising:
 - a pocket for holding informational material; [[and]]
 - an extension extending from said pocket, said extension ~~adapted~~ being flexible for engagement by a window pane when the extension is placed over the window pane and the window pane is in an at least a generally closed position wherein said extension includes a looped portion; and
 - a cylindrical member, said looped portion for holding said cylindrical member wherein said cylindrical member adapts said extension for being engaged by a window pane when the window pane is in the at least generally closed position.
2. (original) The holder according to Claim 1, wherein said pocket is formed by at least one sheet of plastic.
3. (original) The holder according to Claim 2, wherein said sheet of plastic comprises clear plastic.
4. (original) The holder according to Claim 2, wherein said sheet of plastic forms said extension.
5. (cancelled)
6. (original) The holder according to Claim 1, wherein said pocket comprises a first pocket, further comprising a second pocket.
7. (original) The holder according to Claim 6, wherein said second pocket is intermediate said first pocket and said extension.

8. (original) The holder according to Claim 6, wherein said extension includes said second pocket.

9. (original) The holder according to Claim 1, said pocket having an opening for inserting therein and retrieving therefrom the informational material from said pocket.

10. (original) The holder according to Claim 9, further comprising a cover for at least partially closing said opening.

11. (original) The holder according to Claim 10, wherein said cover includes a fastener member and said pocket includes a corresponding fastener member cooperating with said fastener member of said cover to close said opening.

12. (original) The holder according to Claim 10, wherein said fastener members comprise hook and loop members.

13. (original) The holder according to Claim 9, wherein said pocket includes an upper edge when said holder is mounted in a window, said extension extending from said upper edge.

14. (original) The holder according to Claim 13, wherein said opening is located at or near said upper edge of said pocket.

15. (original) The holder according to Claim 13, wherein said pocket includes a side edge and a bottom edge, said opening being located at or near one of said side edge and said bottom edge.

16. (currently amended) A holder comprising:

a first sheet of flexible material;

a second sheet of material secured to said first sheet and forming a pocket with said first sheet, said first sheet ~~having an extension~~ extending beyond said second sheet to

form an extension, said extension having a length sufficient for draping over an upper edge of a window pane;

a loop formed in said extension; and

a cylindrical member positioned in said loop and forming a stop to thereby support said holder from the window pane when said extension and said loop are draped over an upper edge of a window pane and the window pane is at least partially closed.

17. (original) The holder according to Claim 16, wherein said flexible material comprises plastic.

18. (original) The holder according to Claim 16, wherein said second sheet comprises a flexible material.

19. (original) The holder according to Claim 18, wherein said flexible material of said second sheet comprises a substantially clear flexible material.

20. (original) The holder according to Claim 16, wherein said pocket includes an open side to permit material to be inserted into or retrieved from said pocket.

21. (new) The holder according to Claim 1, wherein said pocket and said extension are formed by at least one sheet of flexible plastic material.

22. (new) The holder according to Claim 21, wherein said pocket comprises three closed sides and one open side for access into the pocket.

23. (new) The holder according to Claim 16, wherein said pocket has three sealed sides and one open side for inserting material into the pocket through the open side.

24. (new) The holder according Claim 23, wherein said open side is located at an upper edge of said second sheet.
